FAQ

What does FSC Mean?

The Forest Stewardship Council (FSC) supports the growth of responsible forest management worldwide through its international standards. Framing Success has been awarded FSC Chain of Custody Certificate #SGS-COC-004209 indicating that wood mouldings used in the production of frames are certified to be from a source practicing responsible forest management.

What makes our Bamboo Frame Unique?

Our “Bamboo” frame style is the first diploma frame to carry an FSC product label. The frame is handcrafted with natural bamboo grain FSC certified wood moulding and FSC certified preservation matboards in “Onyx” and “Wheat”.

What is the EPA WasteWise Program?

This Environmental Protection Agency partnership program focuses on waste prevention, recycling and buying or manufacturing recycled content products. Framing Success was named the 2010 Small Business Partner of the Year Honorable Mention award winner for making great progress in reducing the company’s waste generation.

What is the significance of 100% recycled boxes?

Framing Success product boxes are made from 100% post-consumer recycled fiber, saving thousands of trees, gallons of fresh water, minimizing landfills and using energy efficiently.

What is “eco-friendly” building design?

Designed with energy conservation in mind, the Framing Success headquarters & manufacturing building was awarded the HRACRE Excellence in Development Design award in October, 2007. Eco-friendly building features include a geo-thermal loop heat pump with zoned climate controls-a highly efficient alternative energy system.

“Our decision to purchase FSC certified wood shows that we support the growth of responsible forest management worldwide.”
